Hazeltine Agrees to Serve Schools Again As Board Member

(From Tuesday's Daily.)

Pleading press of business and demands made upon his time and attention by the various activities in which he is interested, Mr. E. B. Hazeltine stated to fellow members of the school board of District No. 1 that he felt he must decline to give further time as a trustee of the school system.

In view of the efficiency of his past services, the other members of the board, together with friends interested in the schools, urged him to reconsider his position. His business capacity, it was pointed out, had been of great value to the board of trustees, and of advantage to the development and efficiency of the schools. His connection with other social agencies gives his views on school management and policy an authority which secures the modern in education at no expense to the tried and true.

Mr. Hazeltine has consented to allow his name to be used as a candidate for the position, on the assurance that it is the will of many friends of the schools that he continue on the board of trustees.

NERVY AVIATOR CITY OVERLOOKS SUCCEUMBS TO VISITS TO THE INFLUENZA PIONEERS

(From Tuesday's Daily.)

News of the death of Avery Apperson from influenza at Pensacola, Florida, has been received in this city, and will bring sorrow to many of his acquaintances. Sympathy is being expressed for his sister, Mrs. Morgan C. Dudley, who recently returned from Pasadena, Cal., where she has been attending a sister who also was ill from this affliction.

The deceased following civil engineering in this county when war was declared, leaving in June, 1917, to enter the aviation school at Pasadena, California, from which station he was later transferred to San Antonio, Texas.

As a ground officer he proved a marvel, and at his own request was sent overseas with the first contingent of American aviators to qualify for aerial service. He was in training in France for some months with the famed Ernest Love, of this city, and letters to his sister attest the devotion he had for this idol of Prescott. Mr. Apperson stated some months ago he would resign from the aviation corps to resume his profession, and it is presumed he did.

Personally he was one of the best natured of young fellows, skilled in his calling, and his patriotism was intense. His last letter was dated the day of signing the armistice, when he wrote as follows: "And now that it is all over it stings me to help the quick that I couldn't go up to help the boys; they kept me down, because they wanted me to instruct; I never will forgive or forget."

Mrs. Dudley will take the remains of her brother home to Flint, Michigan, for burial in the family plot and will then return to Prescott.

MINERS MERGE

INTERESTS TO GO AHEAD

(From Thursday's Daily.)

The Gibson type of treatment has been ordered and will have a capacity of six tons per day. The property has been under development under a bond and lease and on the dump are about 100 tons of high grade gold ore, principally free milling. A concentrator is to be added to the plant and inside of ten days milling begins. Mine work continues and the main shaft is 100 feet deep. The property has been idle for many years. Mr. Blount also has individual interests in that belt and the output is to be treated at that point.

(From Tuesday's Daily.)

A rather just complaint has been lodged against the citizens of Prescott in that they fail to visit the Pioneers' Home. This is not a new question, but was brought before the special committee of the chamber of commerce and the members of the legislature when they visited the Pioneers' Home.

It perhaps is mere thoughtlessness and is a matter which can easily be remedied. There are many organizations in Prescott who can make it a point to have their members call at the home and chat with the men who made history for Arizona.

There are many interesting men and women at the home and it is very possible that any one visiting the home would find there some one that they had not anticipated. In any event it is a trip worth taking and the men and women of Prescott should make a call on these pioneers.

The Boy Scouts this week held their campfire council at the home. All scouts and non-scouts attending. These youngsters have started right, others should follow. This matter has been referred to the city affairs committee of the chamber of commerce.
